**Subject:** CFAC Phase II Site Characterization Schedule Reminder

Mike,

As discussed, CFAC and Roux Associates submitted the draft Phase II Site Characterization Sampling and Analysis Plan to USEPA and MDEQ on February 28, 2018.

The schedule in the plan calls for drilling/installation of the new monitoring wells to begin on Monday, April 30, 2018. We view this as a critical date to ensure that we are in position to collect water samples during the high water season in June.

Please let us know if you need any more information or would like to discuss in more detail.
